

Water Breaks

Minnesota winter can be tough on water mains. As the ground freezes and shifts, and when the frost goes out in the spring, water mains are prone to break. If you notice water bubbling out of the ground through cracks in the pavement, from behind curbing, or other locations, call Public Works at (952) 953-2400 (M - F, 7 am - 3:30 pm); evening, weekend, or holiday - **Call 911**.
